

CONSTRUCTION BULLETIN

Notice of Upcoming Relocation of the Sign for the Eastbound Weigh Scale

Weigh scale users are advised that in mid July, crews will relocate the electronic sign for the eastbound weigh scale. The sign is currently located on the south side of Highway 1 eastbound, just west of the 104 Avenue Overpass in Surrey. The sign will be moved slightly west and will be placed on the north side of the eastbound Highway 1 lanes. This will be the permanent location for the sign.

This relocation will take approximately one week to complete. **During this period, an electronic message sign will be placed in the current sign location to indicate whether the weigh scale is closed or open.** There will be no changes to the operation or hours of the weigh scale.

As crews continue to work along one of the busiest corridors in Canada, motorists are reminded to obey construction signs and speed limits, and to watch for flag persons. Please use caution, particularly at night.

A key goal of the PMH1 project is to maximize predictability during construction and minimize disruption for commuters, goods movers, residents and the public. Construction updates will be issued regularly as the project progresses. If you have any questions, or if you would like to be added to our distribution list to receive project updates, please use the contact information below.

The Project

The **Port Mann/Highway 1 Improvement Project** is part of the Ministry of Transportation and Infrastructure's Gateway Program, which will improve roads and bridges for people, goods and transit throughout Metro Vancouver. The project is being delivered by Transportation Investment Corporation with Kiewit/Flatiron General Partnership as the contractor.
