

CONSTRUCTION BULLETIN

Notice of Daytime Lane Closures on Lougheed Highway

As part of the Port Mann/Highway 1 Improvement (PMH1) Project, a number of environmental habitat projects are taking place throughout the corridor. In Coquitlam, a fish habitat enhancement project is underway at Mundy Creek, north of Lougheed Highway (Highway 7), near United Boulevard.

As a result, commencing August 17, 2009, motorists travelling westbound on Lougheed Highway can expect a temporary traffic pattern change. The westbound through shoulder lane (*as shown on the map below*) will be closed as needed, between 9:30 a.m. and 2:30 p.m., for the six-to-eight week duration of construction in the area (depending on the weather). This will not affect Port Mann Bridge-bound traffic.

Trucks will access the work site directly from the temporarily closed road shoulder, and traffic will be monitored to ensure that delays to motorists, if any, are minimal. Please exercise caution and obey posted signs throughout the corridor.

This environmental habitat project work is being conducted in conjunction with the City of Coquitlam.

A key goal of the PMH1 project is to maximize predictability during construction and minimize disruption for commuters, goods movers, residents and the public. Construction updates will be issued regularly as the project progresses.

If you have any questions, or if you would like to be added to our distribution list to receive project updates, please use the contact information below.

The Project

The **Port Mann/Highway 1 Improvement Project** is part of the Ministry of Transportation and Infrastructure's Gateway Program, which will improve roads and bridges for people, goods and transit throughout Metro Vancouver. The project is being delivered by the Transportation Investment Corporation with Kiewit Flatiron General Partnership as the contractor.
